

Gameday

GameDay is a website that helps sports fans track teams, upcoming games, and highlights. The site will provide schedules, player stats, news, and even interactive fan polls. Visitors can explore different sports, see upcoming matches, and store their favorite teams for quick access. A clean design with slideshows for highlight reels and dynamic tables for statistics will make the site engaging. With persistent storage, users can build and manage a personalized “favorites list” of teams or players, keeping their sports experience organized.

Pages

1. **Home** – Overview, latest highlights, slideshow of big games.
2. **Teams** – A page listing teams with logos, stats, and rosters.
3. **Schedule** – Interactive schedule of upcoming games (filter by sport/team).
4. **News** – Sports news articles, updated regularly.
5. **About Us** – Purpose of the site and contact info.

Data Storage

- **Teams** (team name, sport, city, logo, wins/losses, roster).
- **Games** (date, teams playing, location, score if completed).
- **Favorites** (user can “star” teams/players and view them later).
- Only admins can add/edit/delete teams and games
